Academic Projects

1) "Data Visualization and Analysis of Child Mortality based Geo-Spatial Data"
Team Size: 2
Language: MySQL, Python
Description: This project is being done as a part of 1st semester ME curriculum. The main objective of the project is to visualize and analyses the child mortality data so as to make people understand through visualization. We are trying to make an attempt to reach the people around the globe and by letting them to known facts, figures and causes for the child mortality that has happened.

2) "Language Translator"

Team Size: 4
Language: Android Java Programming Language
Description: This project was done as a part of B.E. Final Year curriculum. This project presents an extremely on-demand, fast and user friendly android application- *Language Translator*, which is useful for native tourists and travelers who possess android Smartphone. It enables travelers and tourists to easily capture the native country language books pages, signboards, banners and hotel menus etc. In this project, we have attempted to develop a Language Translator from English to Kannada, using OCR and Google Translator.
